

Genus/species

Andrew, these go straight through Hunter's list

Azolla

Cheilanthes

Carex inversa

Cyperus gracilis

Fimbristylis dichotoma

Gahnia aspera

Lepidosperma laterale

Scleria mackaviensis

Lomandra leucocephala subsp. leucocephala

Cymbidium canaliculatum

Ancistrachne uncinulata

Aristida caput-medusae

Cymbopogon refractus

Bithriochloa

Microlaena stipoides

Alternanthera denticulata

Parsonsia straminea

Calotis lappulaceae

*Schkuhria pinnata var. abrotanoides

Pandorea pandorana

Austrocylindropuntia cylindrica

Opuntia aurantiaca

Dysphania truncata

Dysphania pumilio

Beyeria viscosa

Muellerina bidwillii

Sida

Portulaca filifolia

Psydrax (Canthium)

*Verbena aristigera

Comments

no idea which species
no idea which species

No 100% sure it was dicotoma, but definitely Fimbristylis

Saw two different entities of this

On track to Kookibitta Camp when I went to collect the Chrysocephalum

Hooky grass
Not on Hunter's plant list

Not on Hunter's plant list, probably *B. macra*

I am fairly sure about the species
Swa on the way out on Friday
Checked the seed heads I collected on the way out on Friday
I had thoughtb this was a Senecio!

I think we had this one on the walk back from Kookibitta - that big multi branched thing
AS id'd by several people on NSW native plant id fb page
Perianth segments fused to near apex, but the fruit shape is a better fit for *D. carinata*
I collected on the way out on Friday. I have had both these *Dysphanias* under the microscope.

I knowyou have this, but we found a lot on our way out!
One of the native ones, but I have no idea which one!
on thbe way back from the Dungeon
Saw this down by the bottom of MacIntyre Falls.
now *Glandularia aristigera*

I collected on the way out on Friday
